

VJF INTERNATIONAL INC

Brand Name for Quality Oilfield Products

PipeConqueror VPC Series Pipe Tensioner

SPECIFICATIONS:

Maximum Pipe Size:	3000 mm
Minimum Pipe Size:	100 mm
Maximum Tension:	300 Tons
Clamping Load Range:	0-500 Tons
Maximum Laying Speed:	13M /Min at 300 Tons
Hydraulic System:	0-21 mpA
Electrical Power Supply:	380 VAC 90-180 KW
Weight and Dim:	320 Metric Tons, 10000 x 5000 x 6000 Meters
Application Environment:	Sea, Lake, etc.

FEATURES:

- Available in Horizontal Style for 1-100 Meter Water Depth and Vertical Style for Greater than 100 Meter Water Depth
- Reliable and Powerful Hydraulic and Computer System Precisely Controls the Tracks to the Desired Height and Position With Proper Amount of Tension Load Required by Pipelaying Operation
- Sophisticated Technology is Used in the Electronic Control System Controls and Allow Simultaneously Delivery Operational Parameters to Computer Screens.
- Three Level Troubleshooting and Monitor System Delivers Operational Data to Operator, Production Superintendent and Chief Engineer as well as Equipment Manufacturer for Online Support.
- After Sales Support Available 24/7
