

## VGTS Series Tank and Ship NDT X-Ray Inspection Robot

### SPECIFICATIONS:

Model: VGTS:	7-100
Work Range:	0-360 Deg
Distance Per Trip:	100 M
Crawl Speed:	5-6 MPM
Position Accuracy:	< +/-3MM
Surface Curve Radius:	7M Min
Max Slope :	7 Deg
Film Quality:	GB3323-87,A, AB
Power Supply:	AC 220/110V, 50/60 HZ, 3KVA

### Application:

- Providing Safe and Convenient NDT X-Ray Inspection with Live Recorder/Monitor for Shipbuilding and Tank Construction

### Features:

- Providing Live NDT X-Ray Inspection and Recording on a Curved Surface 0-360 Deg
- Z-Camera Ensures Target Spot In Focus and Provides Stability of the Unit on Vertical Surface
- All Work Done Via Wireless Remote Control, with Less Safety Hazard
- Easy Set up, Simple and Short Preparation
- 10 % More Efficient Than Conventional Inspection Methods
- Cost 60% Less than Conventional Method
- Improved Work Environment for Operators
